**i-FUNCTION: FORMS A VOLTAGE-INDEPENDENT POTASSIUM CHANNEL ACTIVATED BY INTRACELLULAR CALCIUM. ACTIVATION IS FOLLOWED BY WEMBRANE BY INTRACELLULAR CALCIUM. ACTIVATION IS FOLLOWED BY MEMBRANE HYPERPOLARIZATION. THOUGHT TO REGULATE NEURONAL EXCITABILITY BY CONTRIBUTING TO THE SLOW COMPONENT OF SYNAPPIC AFTERHYPERPOLARIZATION. THE CHANNEL IS BLOCKED BY APAMIN.

**i-SUBGNIT: HETERO-OLIGOMER. THE COMPLEX IS COMPOSED OF 4 CHANNEL SUBGNIT: HETERO-OLIGOMER. THE COMPLEX IS COMPOSED OF 4 CHANNEL

I. FUNCTION: FORMS A VOLTAGE-INDEPENDENT POTASSIUM CHANNEL ACTIVATED BY INFACELLULAR CALCIUM. ACTIVATION IS FOLLOMED BY MEMBRANE CONTRIBUTION THOUGHT TO REGULATE NEURONAL EXCITABILTY BY CONTRIBUTION THE CHANNEL IS BLOCKED BY APAMIN.
C ATTEMPTERPOLARIZATION. THE CHANNEL IS COMPOSED OF 4 CHANNEL SUBJUINTS EACH OF WHICH BINDS TO A CALMODULIN SUBGUIT WHICH SUBJUITS THROUGH CALCIUM-BINDING (BY CALMODULIN SUBJUIT WHICH STATES.)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
